COURSE OVERVIEW

The MCSA credential is designed for IT professionals who implement, manage, and troubleshoot network systems based on the Microsoft Windows 2000 and Windows .NET Server platforms. Implementation responsibilities include managing and supporting the network systems. Need for the network administration role has developed in the past year, and candidates as well as the business have indicated that a certification for this profession is necessary. The MCSA on Windows 2000 credential offers network professionals a competitive edge in today's constantly shifting IT environment by validating the specific knowledge required by the systems administrator job role.
